

Scottsdale Airport Clean-Up Day

Scottsdale Airport Clean-Up Day Scheduled for February 11

Private Aircraft owners based at Scottsdale Airport will have an opportunity to properly dispose of their old aircraft tires, lead-acid batteries, and waste petroleum products, paints and cleaners on Saturday, February 11, 2006, from 9 a.m. to 1 p.m. Please don't dump these items in dumpsters.

This collection effort is intended to help private aircraft owners clean-up the unwanted hazardous waste that they may not know how to dispose of properly. Get rid of excessive chemical products and hazardous waste that clutters valuable storage space prior to the annual safety inspections for airport tenants. Separate notification for the springtime inspection dates will be provided via the bulletin subscription service, and on the airport's website www.scottsdaleairport.com. A list of items being accepted during this clean-up day event is available on the airport's website. Commercial operators must make separate arrangements for their hazardous waste removal.

Commercial quantities will not be accepted. Limit of six tires and two batteries per private aircraft owner. Identification (driver's license) is required.

Questions? Comments?

If you have any questions regarding this clean-up event, please contact Jennifer Lewis, Aviation Planner at (480) 312-7609 or jmlewis@scottsdaleaz.gov.

Scottsdale Airport Clean-Up Day

Scottsdale Airport Clean-Up Day Guidelines and Approved Items

The second annual Airport Clean-up Day is an opportunity for private aircraft owners based at Scottsdale Airport to properly dispose hazardous waste items. To participate, you must be:

1. A private aircraft owner currently based at Scottsdale Airport.
2. Have a current aeronautical business permit for Scottsdale Airport.
3. Show a current state issued driver license or other form of state or federal identification.
4. Only drop-off items at the Aviation Business Center parking lot on Feb. 11, 2006, between 9 a.m. and 1 p.m.
5. Bring only hazardous waste items from your hangar, tiedown, or t-shade at Scottsdale Airport, and do not exceed the allowed quantities for these items:

aircraft tires (maximum of six)

lead-acid batteries (maximum of two)

waste petroleum products (maximum of five gallons)

paints, flammable (maximum of one gallon)

cleaners (maximum of one gallon)

solvents, chlorinated and/or flammable (maximum of one gallon)

aerosols (maximum of one gallon)

paint stripper (maximum of one gallon)

If you have questions about specific waste products, please contact Jennifer Lewis, Aviation Planner, 480-312-7609 or via email jmlewis@scottsdaleaz.gov.

Commercial operators must make separate arrangements for their hazardous waste removal.
